SUMMARY

Software Developer with almost 3 years of mern stack development experience, building responsive, scalable web apps with React, Next.js, Node.js, Express.js, MongoDB and RESTful APIs.

EXPERIENCE

ISHR | Full Stack Developer [June 2026 - Present]

Working across the stack on internal tooling, combining a React frontend with a Python backend, and handling deployment.

Scorecard App

- Built the frontend in React and a companion backend in Python (FastAPI) for a scorecard/reporting tool.
- Deployed the application on Railway, setting up the build and hosting pipeline for both frontend and backend services.
- Currently strengthening Python and FastAPI skills while contributing to backend features alongside frontend work.

Executive Solutions | Frontend Developer [Nov 2024 - June 2026]

Contributed to design discussions, led the team, conducted interviews, and coordinated effectively for smooth project execution. Developed the front-end of the HRMS platform Engage using ReactJS, enhancing user experience.

Engage

- Developed core frontend features for a cloud-based HRMS platform, automating payroll and attendance workflows for 500+ users.
- Built responsive and reusable React.js components using Hooks, Context API, and Ant Design to streamline UI development.
- Integrated RESTful APIs for real-time tracking of HR data, enabling data-driven insights across various modules.
- Improved user experience (UX) by implementing dynamic dashboards, modals, forms, and data grids for employee and payroll management.
- Worked on role-based dashboards, enhancing manager and employee-specific views with charts, filters, and insights.
- Collaborated with backend and QA teams in Agile sprints to deliver new features and resolve UI bugs efficiently.
- Optimized performance by implementing code-splitting, lazy loading, and efficient state management.

Adnecto Technology | Software Developer [Feb 2024 - Nov 2024]

Law To-Do App

- Built user-friendly interfaces of Law To Do App using Next.js, JavaScript, HTML/CSS, and Chakra UI.
- Converted page-based routing to app routing to enhance security and prevent credentials from appearing in URLs.
- Built reusable frontend components (e.g., calendar) and utility functions (e.g., text truncation) to improve code reusability and performance.

Temple Website

- Developed a rituals booking feature using card-based UI, allowing users to select rituals and pay accordingly.
- Implemented appointment booking functionality for temple services.
- Integrated secure online payment gateway for ritual and appointment payments.

TECHNICAL SKILLS

Languages: HTML5, CSS3 (Flexbox/Grid), JavaScript (ES6+), TypeScript, Node.js, Python (learning)
Frameworks & Libraries: React, Next.js, Recharts/Chart.js, Redux, RTK Query, FastAPI (learning)
CSS Frameworks: Ant Design, Chakra UI
Tools & Platforms: Git, Webpack, GitHub, Railway (deployment)
Concepts & Methodologies: Responsive Design, Performance Optimization, State Management (Redux), REST APIs, SASS/SCSS

EDUCATION

Bachelor's of Computer Application (BCA) - Guru Gobind Singh Indraprasath University [2020 - 2023]
